

CHAPTER 1
INTRODUCTION

CHAPTER 1

INTRODUCTION

1.1 Objective of The Guide

The Guide aims to achieve the following:

1. To explain the application procedure in greater details.
2. To outline the basic interface requirement between customer's installation and HK Electric supply equipment.
3. To elaborate those major technical requirements of HK Electric Supply Rules.
4. To highlight, in simple terms and pictorial forms, those important wiring installation interface requirements which are often overlooked by registered electrical worker/contractor.

1.2 Precedence of Supply Rules Over The Guide

Under all circumstances, HK Electric Supply Rules shall take precedence over the Guide.

1.3 Limit of The Guide

1. The Guide shall not be construed as part of the terms and conditions of the Supply Agreement.
2. The Guide does not cover details of customer's installation requirements. The installation shall comply with the HK Electric Supply Rules, the latest edition of Code of Practice for the Electricity (Wiring) Regulations and other relevant Government Ordinances and Regulations.

3. The materials contained in the Guide represent the prevailing requirements and/or interpretations at the time of printing. HK Electric reserves the right at any time in its absolute discretion to revise the Guide without further notice. It is the responsibility of the customer and/or his registered electrical worker/contractor to confirm or clarify with HK Electric in case of doubt.

1.4 Interpretation

In the Guide to Connection of Supply, unless inconsistent with the context, words denoting persons include corporations and firms, words denoting the masculine gender include the feminine gender and the neuter gender, and words denoting the singular number include the plural number and vice versa.
