Entering into a New Era of Gas Generation Interim Results Highlights for 2018

	2018	2017	Change
Revenue	HK\$5,457 million	HK\$5,326 million	+2.5%
Distribution Amount	HK\$1,760 million	HK\$1,760 million	-
Interim Distribution per Share Stapled Unit	HK19.92 cents	HK19.92 cents	-

Note: 2018 interim distribution will be payable on 17/8/2018 to holders of Share Stapled Units whose names appear on the Share Stapled Units Register on 8/8/2018.

- The Group has maintained stable revenue income and distribution in the first half of the year.
- Unit sales of electricity increased by 2.1% as compared to 2017 mainly due to a cooler winter and record-breaking May temperatures.
- HK Electric's 2019-2023 Development Plan, a key strategic framework that guides our investments for the next five years, has been approved by the Government. An extensive HK\$26.6 billion capital programme will be implemented to evolve our generation portfolio from coal to gas-fired generation.
- Construction works of two new gas-fired units, L10 and L11, are on schedule for commissioning in 2020 and 2022 respectively. Planning work for another new gas-fired combined cycle unit L12 has commenced for commissioning in 2023, boosting our gas-fired electricity generation further to about 70% of total output by that time.
- Smart meters will be installed for all HK Electric customers. With that, customers can have detailed consumption information for managing their use of electricity. This is a key component for transforming Hong Kong into a smart city.
- HK Electric is planning a series of initiatives to promote energy efficiency and conservation and renewable energy under the new Scheme of Control Agreement. In the second half of the year, we will launch a Feed-in Tariff Scheme and introduce Renewable Energy Certificates for public subscription.
